| **Use Case:** <<USE CASE NAME>> | |
| | |
| User | |
| Application | |
| EdUnify | |
| Service | |
| Service Provider | |

**Use Case:  College Application Transmission**

| User (Student) |
|---|

Submit Application through online portal (one or multiple)

View Application status through online portal

| Application (Application Vendor) |
|---|

Get list of Service Providers from EdUnify that support the Application set of services

For each SP returned, query App service to get list of Recipients

For each Recipient open Service connection and deliver App file in proper format

Handle return codes, results and tracking information

Present Tracking information to User

| EdUnify (Application Providers) |
|---|

Return list of Service Providers and Services for the Type "Application"

| Service Provider (Route Applications) |
|---|

Provide List of Recipients with Service Endpoints, Required file formats, other parameters

| Service (Process Applications) |
|---|

Process App package, provide return codes and results or tracking information
